

PROTEK are aiming for enterprise everybody trust !!!

## Basic Philosophy

Enterprise everybody can trust

We shall be contributing to the society and people's life through the development of the merchandise which is suitable for environmental time using our original creativity and accumulated knowhow.

We always think about our customers who can trust us. We do our best to serve our own products to our customers with the following minds to contribute our society:

1. stable and continuous supply
2. stable and good quality
3. stable and good price

## Activity Guideline

As a professional group companies to produce anything

Protek always suggest customers who can increase their satisfaction with high professional consciousness.

Using the information technology, collecting up to date informations, tying up with partner companies in the world, we keep positively challenging to develop new products and to realize the new idea. In order to accomplish this, we brush up our staffs' quality and skill so that we can respond to our clients as a sensitive professional group.
